TedsWoodworking Review - 16,000 Woodworking Plans And Projects By Ted Mcgrath

Teds Woodworking

16,000 Teds Woodworking Plans and Review

Honest, Professional Ted's Woodworking Review

If you are one of those people who enjoys building woodworking crafts or projects and some basic carpentry skills this website will interest you in the same way that it did me.

The site is [Ted's Woodworking](http://tedswoodworking.cbvlog.com) and it was the best that I have ever seen!

There are over 16,000 (!) woodworking plans which you can download instantly. You will not be disappointed with this one as I have tried some of the others and they were lacking in the instructions which they gave and were hard to understand.

I wanted to try my hand at making some bunkbeds for my two kids so I came across this website and decided to give it a try. The advertisement that I found gave me the website for Ted's Woodworking so when my curiosity got the better of me I clicked on to see what it was all about.

Ted Mcgrath was the originator of this site and is a professional woodworker so he knows what he is talking about. There were so many woodworking plans with this collection and you will not

Teds Woodworking

believe this but there are over 16,000 plans in the one package deal.

This is really something to find that many all together. For someone like me who is just really starting to get involved with woodworking this was like letting me loose in a candy store and telling me I could have anything I wanted. That was my dream when I was a kid.

Well I was very skeptical as there are all kinds of websites for the exact same thing and you have to be careful and I was wondering how one person could possibly get that many plans and woodworking blueprints put together but Ted did it.

I decided to buy it and was not at all disappointed as the pages were done in full color and they were laid out and very detailed which made it easy to follow. I really found it hard to put down and do some other things when I got it as it is so interesting. It gave me new ideas for summer projects!

I figured that with a unconditional money back guarantee that I was given and after a period of sixty days that I had nothing to lose. All I had to do if it was not what I was looking for would be to send it back and get my money back. You can not get any better deal than that.

When I got access to the download area, I was pleasantly surprised with the layout and organization of the plans. With 16,000 plans, you would expect it to be disorganized somewhat.

Teds Woodworking

However, I found it pretty easy to locate the exact project I want. In all honestly, I do not know how he does it for that price all those plans. It must have taken him a long time to put all that together but am I ever glad he did. Thanks Ted.
